JOB DESCRIPTION

COMPANY OUTLINE

Founded in 1999 by Mark Wilsher, Set-up (Scenery) Ltd has gained a reputation for producing bespoke theatre scenery to a high standard thanks to our team of carpenters, fabricators, engineers, fibre-glassers, prop makers, scenic artists, draughtsman and project managers.

Based in our carbon neutral 21,000 m² workshop on the Herts/Cambs borders, just an hour from London by train, we have the space to fully assemble and fly sets in our assembly shop.

Our broad and varied client list includes both large and medium scale West End producers, the National Theatre, the Royal Opera House and many more. From 3"x1" mortice and tenon flats to a 8.5m high revolving head weighing over 4 tonnes, we love what we do and we relish a challenge!

OVERALL JOB PURPOSE

We are seeking a hardworking and reliable CNC Router Programmer/Operator to join our team. Using a Busellato Easyjet 5.12 CNC machining centre, and a wide variety of sheet materials, you will program, set and operate the CNC machine to produce pieces which will then be used to construct high quality scenic items within tight timescales.

ROLE OF CNC ROUTER PROGRAMMER

- » To program the CNC machine to cut a variety of sheet materials.
- » To manage the CNC department, working alongside the CNC operator/assistant.
- » Some operation of the CNC machine when required.
- » To maintain the CNC machine and its associated dust extraction system etc, making Management aware of any issues that may affect the operation.
- » To maintain stock levels of all materials and consumables.
- » To adhere to all health and safety policies and take responsibility for H&S within the CNC department.

PERSON SPECIFICATION

ESSENTIAL SKILLS:

- » Excellent working knowledge of ALPHACAM router software working from both 2D and 3D drawings.
- » Able to interpret technical drawings.
- » Minimum two years experience in a similar workshop environment.
- » Keen, self motivated and reliable.
- » Effective time management skills with the ability to work to tight deadlines.
- » Able to manage others and work as part of a team in a busy workshop environment.

DESIRABLE SKILLS

- » Working knowledge of AutoCAD.
- » Experience of working with wood and acrylics.
- » Forklift certificate.
- » Full driving licence.

JOB REQUIREMENTS

- » Physically capable of undertaking the requirements of the position including lifting, bending, stretching and reaching for long periods of time.
- » Flexibility regarding hours of work: basic hours of this position are 40 hours a week Monday to Friday 8:00 – 16:30, but the nature of the job means you may sometimes be expected to work in the evenings and at weekends.
